# Grand Slam Safety Introduces **//SPECTO™ Fencing System**

**SPECTO Fencing System** is a revolutionary, patented new fencing system for use in sports facilities and around athletic fields that significantly reduces the risk of player injury, maximizes usable athletic space, and affords significantly more field versatility.

The SPECTO Fencing System creates a separation between the fencing mesh and its steel support structures, located 30” behind the mesh. The mesh hangs from cable that is suspended from steel support posts. When a player runs into the fence, he can only make contact with the mesh and gently rebounds back into the field of play. The system maintains its full integrity.

**SPECTO Fencing System is available in  
two primary formats:**

## //SPECTO™ Fencing System

The quality and significant benefits that come with the patented SPECTO System design make this fencing system a great value, too.

### DESIGNED FOR SAFETY

SPECTO Fencing Systems are designed to increase safety. The reduction in related injuries is remarkable.

### MULTIPLE FORMATS

Available in almost any format; outdoor fences, indoor field containment systems, batting cages, tennis courts and more...

### VERSATILE

A permanent fence that is ALSO easy to set-up and tear-down and stores in only 110 sq ft of space. Go from baseball to soccer in less than 2 hours.

### MAXIMIZE YOUR SPACE

SPECTO Fencing Systems maximize field space by protecting players from hard objects within a confined space. Requiring, only 30" of clearance, you can make the most of tight spaces.

### HIGHEST QUALITY

See-through, vinyl-coated, woven polyester mesh suspended from cable allows spectators to watch and supervise play from ground level. The steel posts are seated in post foundations and can be easily removed. SPECTO comes with an **industry-best 10-year warrantee.**

## //Pricing & Support

SPECTO Fencing System pricing is competitive with other permanent and removable fencing systems that offer safety features. When compared with vinyl covered 6-foot chain link fencing with padding or other safety measures, SPECTO Fencing becomes very comparable.

**Call for pricing and quote.**

**“It was a pleasure to deal with a company that kept their word. You were patient with us with all the delays we had, delivered the fences on time, had a full crew there to instruct us on installing the fences and followed up with us to handle any of our concerns.”**

*- George Spescha, Milford Junior Major League*

**“SPECTO Fencing is a high quality product that has been a great addition to our athletic complex. The fence adds the look and feel of a real stadium, and it reduces the risk of injury to our athletes.”**

*- Chris Villiere, South Lewis Central School District*

**“The thing that SPECTO provides is the elimination of ricochets off of posts. We feel this is going to minimize and/or negate those injuries altogether. The quality and the system are very impressive.”**

*- David D'Aquilla, Department of Leisure Services, Gulfport, MS*

## // About Grand Slam Safety

2009. Bob continued to improve the fence, and soon, had requests for more.

Three friends, Mickey Lehman, Dave Moore and Bob Chamberlain, all parents with engineering backgrounds joined Bob in forming Grand Slam Safety LLC in 2009.

Over the next 4 years, GSS continued to improve on the design and show the SPECTO fence system to regional schools whenever a new fence was up for consideration.

School by school, SPECTO grew, and attracted the attention of a local indoor athletic facility. Upon completion of the first indoor field fencing system, GSS has officially caught on.

Today, there are more than 20 fencing systems in place across the US with dozens more on order. indoor facility, Accelerate Sports. Upon completion of the first indoor field fencing system, Grand Slam Safety has officially caught on.

In 2008, a booster at a local high school in upstate NY asked the father of a player about the possibility of building a homerun fence on the varsity baseball field. That parent, Bob Lyndaker, not only thought it was possible, he envisioned a fence that would enhance the game. By allowing for home runs as well as catching fly balls at the fence without fear of injury.

But, months of research yielded no such fence. So, with his engineering mind and quality assurance background, Bob built the very first SPECTO fence in his garage.

With the help of his friends, he delivered it to his son's school, Beaver River Central School, in
